About

Toposław is a tool that facilitates creation of electronic inflectional dictionaries of multi-word units. It is developed at the Institute of Computer Science, Polish Academy of Sciences, Warsaw.

Toposław homepage:

- official: <http://zil.ipipan.waw.pl/Toposlaw/>
- development (with main bugtracker): http://bitbucket.org/piotr_sikora/toposlaw/

Author: Piotr Sikora [piotr.sikora@student.uw.edu.pl]

The program is based on ideas and work of:

Agata Savary

Marcin Woliński

Małgorzata Marciniak

Joanna Rabiega-Wiśniewska

Celina Heliasz

License: GPL v.3

1 Requirements

Toposław is available on Linux and Windows and requires Java Runtime Environment (version 5+).

2 Standards for representation of linguistic information

Toposław currently uses a tagset described in: Marcin Woliński, System znaczników morfosyntaktycznych w korpusie IPI PAN, Polonica XXII-XXIII, str. 39–55, (2003).

Toposław accepts files encoded in Unicode, containing lists of multi-word units (one MWU per line) as input.

Toposław has multiple possible formats of output:

- XML (with custom schema)
- MULTIFLEX text files
- db4o object database

3 Installation

To install Toposław, download it from https://bitbucket.org/piotr_sikora/toposlaw/downloads/ and extract the archive. Then execute Toposław.jar to run the program.

4 Basic usage

Available at https://bitbucket.org/piotr_sikora/toposlaw/downloads, currently only in Polish.
